+ Casing Hardware

# Health Safety & Environment Statement

We believe that as we work in a Health, Safety and Environment (HSE) all incidents are preventable. This would be key to all our operations within health, Safety and Environment (HSE). We based on a belief that incidents are never inevitable and never acceptable. We target to protect personnel, preserve culture and the environment as

we promote our company objectives and ideologies. As an organization, we work systematically to ensure continual improvement of our HSE culture and performance. We have an HSE operating system which defines our expectations in the areas which are key to effective HSE management. These expectations set direction

and help our company to move continually towards attaining higher goals. Safety Performance is a top priority for Weafri Well Services CO. Ltd. From top management to frontline staff, all employees are committed to an Incident free operation. In Towset Energy Resources Ltd, it is always "Safety without Compromise"

## DRUG & ALCOHOL POLICY

Drug taken without trained first aid's prescription amounts to abuse. Therefore, on no account shall drugs be taken without the consent and under the administration of a trained first aid. Drinking, storage and use of alcohol within perimeter of our site is prohibited. To this end, the management will discipline appropriately employees and contractor staff who flaunt the stipulations of this policy.

## SEAT BELT POLICY

All company vehicles are fitted with functional seat belts. Occupants of moving vehicles must wear seat belts. Any vehicle which does not meet with the above requirement is not given access into our premise.

## HSE

In Towset Energy Resources Ltd, it is always "Safety without Compromise"

# Coiled Tubing

WEAFRI Well Services Company Limited provides advanced Coiled Tubing solutions for efficient well intervention and production optimization, including cleanouts, stimulation, nitrogen kick-offs, and sand/scale removal. With modern equipment and skilled experts, we deliver safe, reliable, and cost-effective results across onshore, swamp, and offshore operations.

## Completion Tools

WEAFRI Well Services Company Limited offers advanced Completion Tools engineered to enhance well integrity, optimize production, and ensure reliable performance. Our solutions, including liner hangers, packers, and flow control devices, are designed for efficiency across onshore, swamp, and offshore operations.

Our liner hanger/packer systems feature premium designs that support modern wellbore construction with reduced casing diameters, ensuring efficiency and cost savings. The TXP/VXP packer and GSP hanger address tight clearance liner challenges, combining advanced technologies into high-performance tools.
